Object Model Open Issue List
=====

Pluto doesn't provide full-fidelity of the portlet.xml
A lot of short-cuts are taken
This document lists all known issues

PortletDefinition

1. expirationCache, why String? (Pluto)
2. Display Name doesn't have language support (array)
Look at Paul's Castor implementation, already solved
see old model: `org.apache.jetspeed.om.common.base.BaseDisplayName`
3. Description is missing
It also uses an array based on language
see old model:
`org.apache.jetspeed.om.common.impl.CastorJdoPortletDescription`
4. Supports ID is not stored
`<supports id="Minimal support">`
5. Not tested or mapped
`<xs:element name="supported-locale" type="portlet:supported-localeType"
minOccurs="0" maxOccurs="unbounded"/>
<xs:element name="resource-bundle" type="portlet:resource-bundleType"
minOccurs="0"/>
<xs:element name="security-role-ref" type="portlet:security-role-refType"
minOccurs="0" maxOccurs="unbounded"/>`
