In addition the standard maven goals, the following goals have been defined.

**1.**

Goal	Description
allBuild	Builds war and jar files in the correct order for each subproject, including the portlet applications. After each war or jar is build, it is copied to the local maven repository.
allClean	Cleans all subprojects and the root project.
allSite	See the allSite goals in the Site subproject

**2.**

Goal	Description
allSite	Builds the site for each subproject and updates the subproject list on the navigation bar. This calls the "subSite" and "site" goals.
subSite	Builds the site for each subproject, excluding the "site" subproject, and updates the subproject list on the navigation bar.
